

Colorcrete Mix.

Colorcrete Mix is the ready-to-use dosage for coloring microcements. It is obtained from Colorcrete Base pigment pastes and is specifically prepared for certain types and weights of microcements and their finishes.

Characteristics

- Easily miscible.
- Water-based, non-flammable.
- Free of plasticisers, solvents, ammonia and emulsifiers.
- High colour stability. Pigments suitable for outdoor applications.
- Alkali resistant.

Application

To obtain the colours in the Luxury Concrete® catalogue, the dosage indicated by the manufacturer must be respected. Both for the quantity and for the type of system used and sealer.

Pigments compatible with Concrete Base, Concrete Floor, Concrete Wall, Concrete Stone, Limecrete, Concrete Pool and Easycrret. microcement systems.

1. Homogenise Colorcrete Mix until a homogeneous liquid is obtained.
2. Add the Concrete Resin and mix with mechanical agitation at low speed.
3. Gradually add the powder until the viscosity required for each application and a homogeneous colour is achieved. In the case of Easycrret, add the product directly and homogenise.

They are also suitable for Industrial, our epoxy microcement.

1. Add Colorcrete Mix to component A, component B is not pigmentable. Previously, component A has been mixed with Concrete Pox Speed Up.

Special precautions

To prevent the product from drying out or thickening, close the lid after each use. Non-toxic, non-hazardous and non-flammable under normal handling conditions. This product does not contain any harmful substances that would require, under current regulations, any additional labelling measures.

In case of contact with skin, wash with soap and water.

Never use solvents or thinners. Do not swallow. In case of ingestion do not induce vomiting and seek medical attention immediately.

The following measures are recommended:

- Protective goggles to prevent splashing.
- Rubber gloves.

Empty containers should be disposed of in accordance with legal regulations.

For further information see safety data sheet. For further information please consult the product safety data sheet.

Consumption

Depending on the colour of the dose to prepare.

Packaging

Different pack sizes depending on colour and size of dosage.

Storage conditions

The product must not be used for purposes other than those specified, without first having the product instruction in its handling. It is always the responsibility of the user to take appropriate measures in order to comply with legal requirements. The Safety Data Sheets of the product are available to the professional.
