

# Concrete Clean.

**Concrete Clean is a high-performance cleaner with low environmental impact components formulated specifically for microcement floors.**

## Properties

- Ecological.
- Biodegradable.
- Highly effective in domestic cleaning. Suitable for all types of surfaces.
- Slightly alkaline detergent, low foaming, but extraordinary degreasing power, descaling and emulsifying power.
- Removes almost all types of dirt such as grease, food residues, limescale marks, oil, wine, blood, chocolate, etc.
- For cleaning kitchens, ovens, bathrooms, floors, glass, tiles, stains, grease stains, fabrics, etc. Especially for the maintenance of microcement.
- In accordance with Regulation (EC) No. 648/2004 of the European Parliament and of the Council of 31 March 2004 on detergents for cleaning.

## Used and application fields

Concrete Clean is specially indicated for the elimination of almost any kind of dirt, with a great penetrating power, eliminating encrusted stains. Especially recommended for cleaning microcement.

For general use, both on walls and floors. Especially on surfaces such as marble, granites, granite, tiles, ceramics, stoneware, polished concrete, stainless steel, microcement, glass-ceramic, glass, etc.

Effectively removes: grease, oil, food residues, household dirt, limescale marks, etc.

Due to its surfactant and solvent nature, it allows the cleaning and removal of grease and dirt in depth, especially on porous surfaces. Highly recommended for cleaning and maintenance in kitchens, bathrooms, floors, dining rooms, etc., thanks to its sequestering action, it allows the removal of biofilm, food and any other dirt that is generated and contributing to the correct maintenance of the same.

It can be applied from pure to diluted 1:20 in water, depending on the type of surface and the degree of dirt to be removed. The more concentrated, the faster and more powerful the action.

In homes, offices, stores, bathrooms, dining rooms, ovens, microwaves, glass-ceramic hobs, tables and countertops, cuffs and collars, washbasins, faucets, etc. After application, the treated surface should be rinsed with water to remove the remains of the product.

## Consumption

Its pure yield is approximately 165 - 2 - 50 mL/m<sup>2</sup> of product; diluted 1:5 in water 33 - 50 mL/m<sup>2</sup>; and diluted 1:20 in water 10 - 12.5 mL/m<sup>2</sup>, depending on the degree of soiling, type of substrate and absorption.

## Characteristics

- Concrete Clean is a concentrated alkaline detergent cleaner based on special alcohols and surfactants, free of EDTA, chlorine, phosphates and ammonia, phosphates and ammonia.
- Water soluble

## Technical data

- Color: Green
- Appearance: Transparent liquid
- Density: 1,04 ± 0,02 g/cm<sup>3</sup>
- pH: 9-10
- Diluent: Water

## Application

### In Microcement:

Use 40-50 mL of product per 5 L of water. Apply with a mop and rinse.

Important: before using Concrete Clean, wait at least two weeks after the application of Concrete Finish WT or Concrete Finish DSV varnish, in order to guarantee its correct curing guarantee its correct curing and thus avoid damaging it.

### General uses:

The application is carried out in concentrate and/or dilution with the aid of a synthetic bristle brush, sprayer or synthetic bristle brush, sprayer, sponge, scouring pad or by means of suitable cleaning machinery. It can be applied from pure to diluted 1:20 in water, depending on the degree of dirtiness of the surface and the type of cleaning.

It is recommended to rub with a brush in the treated areas to facilitate the action of the cleaner. Leave to act from 5 to 15 minutes to obtain a deep cleaning.

Rinse with water before the product dries and the dissolved dirt. Cleaning with hot water can favor the action of Concrete Clean.

For maintenance tasks the product can be diluted up to 1:20. It can be used as a floor cleaner for cleaning and maintenance of floors in general.

In large surfaces, carry out preliminary tests in inconspicuous places to find the adequate dilution for each surface and degree of soiling, in order to determine the average performance of the product.

## Special precautions

Irritant product. In case of contact with eyes, rinse with plenty of water for 15 minutes and seek medical attention. In case of contact with skin wash with soap and water. Never use solvents or thinners. Do not swallow. In case of ingestion do not induce vomiting and seek medical attention immediately.

- It is recommended to comply with the following measures:
- Good ventilation.
- Use of mask with chemical absorbent.
- Protective goggles to avoid splashing.
- Rubber gloves.

Empty containers should be disposed of in accordance with current legal regulations.

To prevent the product from drying or thickening, close the lid after each use.

Keep out of reach of children.

## Storage conditions

The product should be stored in its original closed container and protected from the weather at temperatures between 10°C and 30°C, in a dry and well ventilated place, away from heat sources and direct sunlight. The shelf life is 1 year from the date of manufacture, if stored properly.

## Packaging

Presented in 1 and 5 liter plastic containers.

## Cleaning of the tools

The tools are washed with water, immediately after use, allowing them to dry
